

Alcohol

Test yourself and get immediate feedback.

The Alcohol Use Disorders Identification Test (**AUDIT**) developed by the World Health Organization has been found to be effective in identifying excessive consumption.

The Short-form Alcohol Dependence Data Questionnaire (**SADD**) is used for evaluating the degree of addiction.

A **Comprehensive test on alcohol use** provides personalised feedback discussing the absorption and processing of alcohol in the body and annual consumption statistics.

To access the tests, click the appropriate link on the left.
